Holistic, bionic and disruptive**

Additive Manufacturing Area at the METAV 2018 is ideally suited for networking

((03-01 Rainer Lotz.jpg))

To quote Rainer Lotz, Managing Director of the Renishaw companies in Germany, Austria and Switzerland: "The METAV 2018, in conjunction with the specialised additive manufacturing conference, offers an ideal framework for networking with numerous users and firms in the sector, since only together will we make swifter progress. We believe it will invigorate the entire sector, and are looking forward to plenty of rewarding mutual feedback.
