Medical Area at the METAV 2018: a healthy form of cooperation for
curative technology**

((04-01 Citizen_Nils-Westphal.jpg))

To quote Nils Westphal, who heads the Neuss facility of Citizen Machinery Europe GmbH: "We are delighted to seize the opportunity that the METAV 2018 offers us with the Medical Area for a separate presentation of our expertise in the field of medical technology."

Consummately fit for purpose: Citizen's automatic headstock lathes (here the Cincom M16-4M8), thanks to their easily accessible machine interiors and high-pressure cooling lubricant systems, are ideally suited for reliable production of medical technology.

Ultra-stringent quality stipulations for component suppliers: for the all-round no-worries package, Citizen attaches high priority to top-quality outsourced parts, here articulated coolant hoses made of stainless steel.
